FOR IMMEDIATE RELEASE

UNGER FABRIKKER, AS. EXTENDS LAS DRYING CAPACITY WITH ADDITIONAL 3000 MT

Fredrikstad, Norway, May 5, 2015. Unger Fabrikker of Norway manufactures and exports a wide variety of surfactant raw materials applied in household detergents, personal care and institutional products, as well as functional additives for industrial applications – worldwide. The new capacity means Unger strengthens its leading position in the industry of toilet care and can attend the increasing global demand for surfactants through innovative solutions.

“We intend to keep the trust and the confidence invested in us to continue delivering high quality-performance products, which have been the signature of Unger’s success at improved production costs”, adds Jan Ivar Ruud (Managing Director of Unger Fabrikker, AS.)

Unger’s investment brings more reach to existing and potential markets, more visibility towards organizational evolution, more opportunities for research & development and additional production of Ufaryl®.

Ufaryl® is one of Unger’s product lines ranked among the best solutions in the world for home care and toilet care applications.

For more information, contact Jan Ivar Ruud of Unger Fabrikker at + 47 906 28 805 or e-mail Mr. Ruud at jan.ivar.ruud@unger.no for a detailed company brochure and logo & brand materials.
